

## CERTIFICATIONS

**Cambria is proud to have the following certifications:**

Find out more about our [Greenguard](#) certification.

Find out more about our [NSF International](#) certification.

Find out more about our [UMKosher](#) certification.

For more information on our quality assurance commitment, contact a Cambria Sales Professional today at **1-866-CAMBRIA**.

## CAMBRIA GREEN

Cambria understands and emphasizes the importance of environmental responsibility, both in its product offerings and business practices:

**Natural materials** - Cambria is 93% natural quartz, an extremely hard stone that is quarried directly from the earth and adds distinct beauty, strength and durability to any project.

**Recycling processes** - Cambria recycles and recovers 98% of the water used in its polishing processes through a series of unique settling and filtering techniques. Cambria Natural Quartz Surfaces™ also offer distinct product advantages in the areas of environmental health and safety.

### *GREENGUARD*

**Indoor Air Quality** - Cambria is GREENGUARD Indoor Air Quality Certified® by the GREENGUARD Environmental Institute (GEI) under the GREENGUARD Standard for Low Emitting Products. This accreditation means that use of Cambria meets indoor air standards and contributes one (1) point in any LEED-certified building project in the Indoor Environmental Quality category.

**What is LEED?** - LEED (Leadership in Energy & Environmental Design), is an accreditation program conducted by the U.S. Green Building Council that certifies building projects based on performance under the LEED Rating System. LEED accredits professionals committed to facilitating sustainable design. For building projects, LEED points can be awarded in either of two LEED Certification Categories, Indoor Environmental Quality or Materials and Resources. For further information on LEED, visit the USGBC website at [www.usgbc.org](http://www.usgbc.org).

**Children & Schools** - Environmental toxins can exist in food, water and air. Children consume more food, water, and have higher inhalation rates per pound of body weight than adults. Cambria is also proud to be GREENGUARD For Children & Schools<sup>sm</sup> certified by GEI and is safe for use in schools and daycare. Cambria also complies with the State of California's Department of Health Services (CDHS) Standard Practice for testing chemical emissions, a stringent certification that can be used to earn valuable credits in the CDHS Best Practices Manual for K-12 schools.

**NSF International Certification** - For over 60 years, NSF International has helped protect consumers by certifying products and writing standards for food, water, air and consumer goods. As an independent, not-for-profit organization, NSF's ongoing public health commitment is to encourage everyone to live safer. All Cambria colors meet NSF 51 Food Zone Compliance. Cambria's non-porous surface prevents absorption of food materials and harmful bacteria, and eliminates the potential for staining. Cambria doesn't require sealing or maintenance to protect the surface; it is naturally safe for your home.
